

Are you interested in participating in Advanced Research?

Join one of the Naval War College's Advanced Research Project (ARP) Groups and continue the tradition of war gaming and independent research on a wide array of operational and emerging technical problems.

When joining a research group, you will participate in one full trimester of research in place of one of the core courses (National Security Affairs or Strategy and Policy) and take Advanced Research as your elective track.

You receive the same JPME credit and Masters Degree as non-ARP students but have the opportunity to contribute to cutting edge research -- relevant to today's operational environment.

CONTINUE THE LEGACY...

HALSEY ALFA

Operations research and war gaming of current and future high-intensity warfare in the Pacific Region, at the tactical-operational level. Implications of warfare imbalances of conventional warfare in maritime area-denial situations.

James Fitzsimonds
fitzsimj@
usnwc.edu
401.841.6931

HALSEY BRAVO

Current medium-intensity, asymmetric and anti-access challenges in the Middle East, at the tactical-operational level. Implications of warfare challenges in maritime area-denial situations.

Bill Murray
william.murray@
usnwc.edu
401.841.6984

GRAVELY GROUP

Evolving nascent technologies, operational planning and command & control concepts focused on the functional areas of Ballistic Missile Defense and Anti-submarine Warfare.

Will Bundy
william.bundy@
usnwc.edu
401.841.2674

MAHAN SCHOLARS

Plans, policy & force structure for nuclear weapons, strategic deterrence & escalation control. War game planning, development and execution.

Michael Chase
michael.chase@
usnwc.edu
401.841.4711
